PROFILE

Software Engineering and Information Systems Engineering student at ISIMG, Tunisia, with a strong interest in full-stack web development, Artificial Intelligence, and cybersecurity. Passionate about building innovative and practical software solutions, with hands-on experience in RAG-based AI applications, web development, and secure information systems. Seeking a final-year internship (PFE) starting in 2027 to contribute to challenging projects and further develop my technical expertise .

EDUCATION

2024 – present
Engineering Degree — Software Engineering and Information Systems, 3rd year
Higher Institute of Computer Science and Multimedia of Gabes (ISIMG), Tunisia

Sep. 2025 – Feb. 2026
Cybersecurity Bootcamp — CompTIA Security+ 701
GoMyCode, Tunisia
Intensive 6-month training covering network security, cryptography, threat management, risk assessment, and security compliance.
Cybersecurity | CompTIA Security+ | Networking

2022 – 2024
Integrated Preparatory Cycle in Computer Science
Higher Institute of Computer Science and Multimedia of Gabes (ISIMG), Tunisia

2022
Baccalaureate — Experimental Sciences
Ibn El Haytham High School, Ghannouch, Gabes, Tunisia

PROFESSIONAL EXPERIENCE

Jul. 2026
Internship — Artificial Intelligence and Software Development
Norma SAS, Gabes, Tunisia
Enhanced the KPIMaster Assistant module by implementing a Retrieval-Augmented Generation (RAG) architecture for intelligent information retrieval and response generation.
Python | FastAPI | ChromaDB | PostgreSQL | RAG | React | TypeScript | Embeddings | LLM | Vector Search

Aug. 2025
Internship — iDaraty | Intelligent Chatbot for Tunisian Administrative Procedures
Tmkiin, Gabes, Tunisia
Design and development of a bilingual (French/Arabic) intelligent chatbot based on RAG and LangGraph, making it easier to access Tunisian administrative procedures and PDF forms, and to locate administrations through an interactive map, with a notification system to keep users informed.
Python | LangGraph | LLM | RAG | Embeddings

Jul. 2025
Internship — Occupational Health Web Application
GIWS, Gabes, Tunisia
Developed GIWS Sante, a web platform for employee occupational health monitoring, including medical record management, medical visits, workplace accidents, and statistical reporting.
React | Laravel | MySQL | Scrum

Jun. 2025
Freelance Web Developer
Project: Multi-Site Hotel Management System
Developed a complete web application for managing staff and tasks across a hotel chain. Implemented dashboards for administrators, receptionists, and staff, as well as internal messaging, real-time reporting, and secure authentication.
PHP | MySQL | JavaScript | jQuery | Bootstrap 5

ACADEMIC PROJECTS

2026 **Plant Disease Detection with Deep Learning**

Academic project, ISIMG

Multi-class classification of plant diseases from leaf images using transfer learning (VGG16), with data augmentation and a comparison of fine-tuning strategies (accuracy, precision, recall, F1-score, confusion matrices).

Python | TensorFlow | Keras | VGG16

2026 **Arabic Spam Detection with NLP and Transformer Models**

Academic project, ISIMG

NLP pipeline for classifying Arabic tweets (spam / non-spam): text preprocessing, then comparison of TF-IDF, Word2Vec (CBOW, Skip-Gram), FastText and AraBERT (accuracy, precision, recall, F1-score, confusion matrices).

Python | NLP | AraBERT | Word2Vec | FastText | Scikit-learn

2025 **E-commerce Website — ASP.NET Core**

Academic project, ISIMG

Developed a complete e-commerce application featuring product catalog management, shopping cart, order and payment management, user management, and order history.

ASP.NET Core MVC | Entity Framework Core | SQL Server

2025 **Real-Time Room Booking Mobile Application**

Academic project, ISIMG

Designed and developed a mobile application for real-time room reservations, including user management, reservation management, and availability tracking.

Flutter | Dart | Firebase | REST API

TECHNICAL SKILLS

Languages:	JavaScript, Dart, PHP, Python, Java, C, C++, SQL, HTML/CSS
Frameworks :	React.js, React Native, Flutter, Node.js, NestJS, Laravel, Django, TensorFlow
Databases:	MySQL, MongoDB, PostgreSQL
Tools:	Git / GitHub, VS Code, Postman, Docker, Ollama, UiPath
Methodologies:	Agile, Scrum, UML, DevOps
Cybersecurity:	Network security, cryptography, threat management
AI & Data:	RAG, LLM, LangGraph, LangChain, ChromaDB, FAISS, NLP, Transformers, Embeddings, Hugging Face, Sentence Transformers, Data Cleaning & Preprocessing, Chunking, TensorFlow

CERTIFICATIONS

Apr. 2026 **Blockchain Fundamentals** — *Distributed Ledger Technology*
Mar. 2026 **Hashgraph Developer Course** — *The Hashgraph Association*
Mar. 2026 **Hedera Business Foundation (HBF)** — *The Hashgraph Association*
Feb. 2026 **CompTIA Security+ 701** — *GoMyCode*
Sep. 2025 **Python 101 for Data Science** — *IBM / Cognitive Class*
Apr. 2025 **Generative AI with Diffusion Models** — *NVIDIA*
Apr. 2025 **Scrum Fundamentals Certified (SFC™)** — *SCRUMstudy*

LANGUAGES

Arabic — Native **French** — B2 **English** — B2

ACTIVITIES & ENGAGEMENT

Jan. 2024 – present **Active Member**

JCI Gabes — Junior Chamber International

May 2023 – present **Member — IoT Club**

ISIM, Gabes
